- **REALTIME TRACKING**  
Visually displays deal progress and documents or actions that are outstanding in realtime.
- **COST SAVINGS**  
Proven to be cost efficient while reducing printing, storage, and supply costs by up to 70%.

## THE DIGITAL SOLUTION THAT WORKS FOR YOUR VEHICLE DEALERSHIP.

**MotorDX Deal Files** is the software solution that replaces the conventional paper-based deal file system, ensuring that documentation is never lost or misplaced and that all new deals are addressed promptly and completed to the same exacting standards every time.

A major benefit the system offers is the digital remote collection of client signatures and supporting documents. The client simply signs using his/her smartphone or tablet and all supporting documents are received via e-mail.

Realtime tracking of the status of each deal provides the salesperson and sales manager a dashboard view of potential bottlenecks and outstanding items to be addressed. No other system offers a one-stop approach to deal files that is 3rd-party integrated, fully digital, audit and quality compliant and easy to set up and manage.

**MotorDX Deal Files** will take your deal file management to the next level of professional and efficient client interactions and will save you time and money.
